Reflux Diagnosed

CHRONIC **COUGH?**
CHRONIC **THROAT CLEARING?**
CHRONIC **HOARSENESS?**

These are common symptoms of laryngopharyngeal reflux (LPR).
Is reflux a factor?

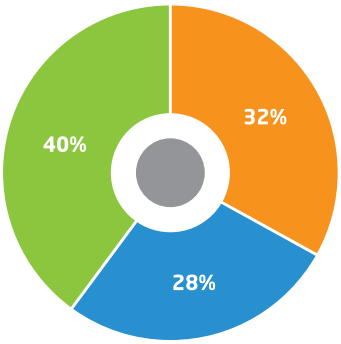
a simple test

COMFORTABLE TEST. ACCURATE RESULTS.

The only minimally invasive reflux testing system for use in the oropharynx, revealing reflux-related etiology of presenting symptoms.

Empiric trial or definitive diagnosis?

Restech's simple test was designed specifically for the airway. The pH probe is placed in your office in a matter of minutes. Eliminate the guesswork. Properly evaluate reflux activity to best direct treatment.



- **RESPONDERS**
  pH normalization
  Symptom normalization
- **PARTIAL RESPONDERS**
  No pH normalization
  Symptom normalization
- **NON-RESPONDERS**
  No pH normalization
  No symptom normalization

Waxman J, Yalamanchali S, Valle ES, Pott T, Friedman M. Effects of Proton Pump Inhibitor Therapy for Laryngopharyngeal Reflux on Posttreatment Symptoms and Hypopharyngeal pH. *Otolaryngol Head Neck Surg*. 2014;150: 1010-1017.

DEFINITIVE DIAGNOSIS

Avoid unnecessary exposure to medication. Highly sensitive airway sensor technology monitors reflux activity to aid in your diagnosis.

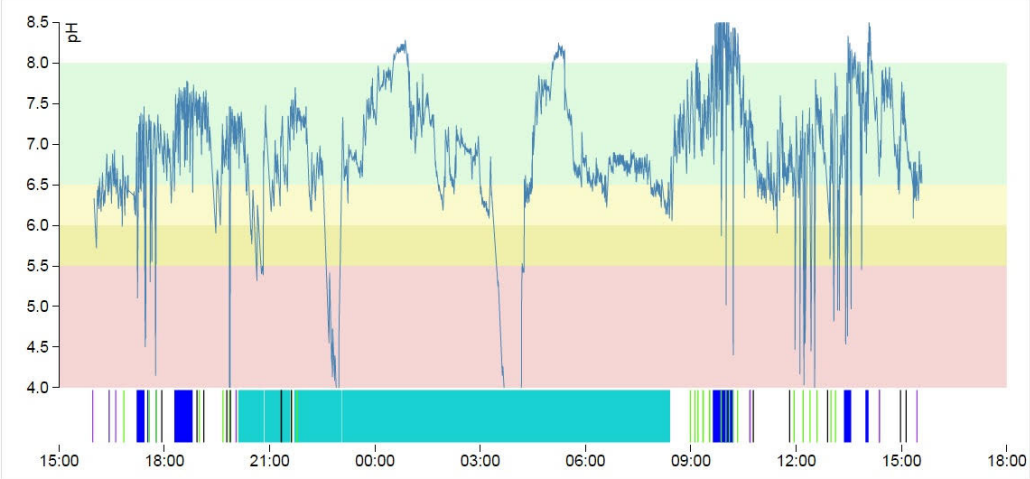
TARGETED TREATMENT

Utilize the Restech Report to establish an evidence-based treatment plan. Conduct follow-up testing to monitor treatment efficacy.

CONTROL COSTS

Established CPT code reimbursed by Medicare and all major insurers. No pre-authorization required.

Sophisticated engineering behind the scenes, simplicity at your fingertips.



1. Simple set up with a 15 second calibration.
2. Completely visual probe placement, NO anesthesia or other cumbersome procedures necessary.
3. Patient wears the probe for the duration of the study, performing normal activities of daily life.
4. Detailed, dependable results help you design appropriate, targeted treatment.
